

**Amendments to the Claims**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims**

**Claim 1 (Currently Amended)** A data processing apparatus for effecting a predetermined process with respect to another data processing apparatus, comprising:

a recognition unit for recognizing ~~a charge~~ an account function of another data processing apparatus;

a decision unit for deciding whether said data processing apparatus is to effect ~~a charge~~ an account process for a first process by said data processing apparatus and for a second process by said another data processing apparatus in accordance with the recognition by said recognition unit; and

a control unit for controlling execution of the ~~charge~~ account process in accordance with the decision by said decision unit.

**Claim 2 (Previously presented)** A data processing apparatus according to claim 1, wherein said decision unit effects the decision on a basis of information received from another data processing apparatus.

**Claim 3 (Currently Amended)** A data processing apparatus according to claim 1, wherein the predetermined process is a process for printing an image read by said another data processing apparatus in the data processing apparatus; and

the ~~charge~~ account process is based on at least one part of information regarding the number of images read by said another data processing apparatus, monochromatic reading, color reading, the number of sheets to be printed by said another data processing apparatus, monochromatic printing and color printing.

**Claim 4 (Currently Amended)** A data processing apparatus according to claim 1, wherein the predetermined process is a process for printing an image read by the data processing apparatus in said another data processing apparatus; and

the ~~charge~~ account process is based on at least one part of information regarding the number of images read by the data processing apparatus, monochromatic reading, color reading, the number of sheets to be printed by said another data processing apparatus, monochromatic printing and color printing.

**Claim 5 (Currently Amended)** A data processing apparatus comprising:

a processing portion for effecting a predetermined process with respect to another data processing apparatus; and

an information portion for informing said another data processing apparatus of ~~charge~~ account function information of the data processing apparatus, so that double ~~charge~~ account for the predetermined process by said data processing apparatus and said another data processing apparatus is prevented; and

~~a charge~~ an account portion for executing ~~a charge~~ an account process for a first process by said data processing apparatus and for a second process by said another data processing

apparatus in order to execute the predetermined process after the informing by said information portion.

**Claim 6 (Currently Amended)** A method for controlling a data processing apparatus for effecting a predetermined process with respect to another data processing apparatus, comprising:

recognizing ~~a-charge~~ an account function of the another data processing apparatus;

deciding whether said data processing apparatus is to effect ~~a-charge~~ an account process for a first process by said data processing apparatus and for a second process by said another data processing apparatus in accordance with the recognition in said recognition step; and

controlling execution of the ~~charge~~ account process in accordance with the decision by said decision unit.

**Claim 7 (Currently Amended)** A method for controlling a data processing apparatus comprising:

effecting a predetermined process with respect to another data processing apparatus;

informing said another data processing apparatus of the ~~charge~~ account function information of the data processing apparatus, so that double ~~charge~~ account for the predetermined process by said data processing apparatus and said another data processing apparatus is prevented; and

executing ~~a-charge~~ an account process for a first process by said data processing apparatus and for a second process by said another data processing apparatus in order to execute the predetermined process after the information by said information step.
